

CCC Intelligent Solutions Introduces OEM Repair Certification Management Solution

January 8, 2026 at 8:00 AM EST

Nissan is the first automaker to join the CCC® OEM Link Network to streamline their certification process and improve performance visibility, supporting quality repairs

CHICAGO, Jan. 08, 2026 (GLOBE NEWSWIRE) -- CCC Intelligent Solutions Inc. (CCC), a leading cloud platform provider powering the P&C insurance economy, today announced that Nissan will be the first automaker to participate in the [CCC® OEM Link Network](#), a newly launched offering from CCC designed to support OEM collision certification programs. Through their participation, Nissan will leverage CCC technology and services to support the entirety of its growing Certified Collision Repair Network, which today includes approximately 2,000 collision repair facilities across the U.S.

Vehicles today increasingly incorporate advanced materials and technologies, from high-strength steel and aluminum to EV powertrains and sophisticated driver assistance systems. As vehicle complexity grows, repairs require specialized equipment, processes, and technician training. Yet, OEM certification participation has stagnated, in part due to the challenges shops can face with related requirements, program administration, and uncertainty around return on their investment (ROI).

CCC OEM Link will help automakers and their repair network participants address these challenges. As part of this new partnership, CCC will manage certified network operations for Nissan, including the administration of shop audits, billing processes, and communications between the OEM and its certified repairers. Support will be delivered through CCC's leading software platform and its full-time field operations employees, who bring extensive experience working directly with collision repairers nationwide.

"As vehicles become more advanced, achieving safe and proper repairs requires strong collaboration across the entire ecosystem," said Andreas Hecht, senior vice president of OEM services at CCC. "With OEM Link, CCC is establishing a foundation for certified repair programs that enable automakers and repairers to work in lockstep, delivering repair quality and reinforcing customer confidence. We're proud to welcome Nissan as the first automaker to join the OEM Link network, underscoring their commitment to getting drivers back on the road quickly and safely."

OEM Link will help reduce administrative burden for repair shops while helping Nissan maintain network consistency, support technician readiness, and strengthen brand reputation through high-quality repairs. Nissan is committed to providing strong ROI for their certified shop network and has already begun sending an increasing number of job referrals to its certified shops. With more than 30,500 shops using CCC software every day, Nissan gains a partner who can actively help with the expansion of their certified program with qualified shops across the U.S.

Special Note Regarding Forward-Looking Statements

This press release contains forward-looking statements that are based on beliefs and assumptions and on information currently available. In some cases, you can identify forward-looking statements by the following words: "may," "will," "could," "would," "should," "expect," "intend," "plan," "anticipate," "believe," "estimate," "predict," "project," "potential," "continue," "ongoing" or the negative of these terms or other comparable terminology, although not all forward-looking statements contain these words. These statements involve risks, uncertainties and other factors that may cause actual results, levels of activity, performance or achievements to be materially different from the information expressed or implied by these forward-looking statements. Forward-looking statements in this press release include, but are not limited to, statements regarding future use and performance of CCC's digital solutions. We cannot assure you that the forward-looking statements in this press release will prove to be accurate. These forward-looking statements are subject to a number of risks and uncertainties, including, among others, competition, including technological advances and new products marketed by competitors; changes to applicable laws and regulations; and other risks and uncertainties, including those included under the header "Risk Factors" in CCC's filings with the Securities and Exchange Commission ("SEC"), including the Form 10-K filed February 25, 2025, which can be obtained, without charge, at the SEC's website (www.sec.gov). The forward-looking statements in this press release represent our views as of the date of this press release. We anticipate that subsequent events and developments will cause our views to change. However, while we may elect to update these forward-looking statements at some point in the future, we have no current intention of doing so except to the extent required by applicable law. You should, therefore, not rely on these forward-looking statements as representing our views as of any date subsequent to the date of this press release.
